## Summary

I am an old techie who cut his teeth on old-school chat rooms and honed his skills in Age of Empires II. I worked to analyze blood samples throughout the pandemic and am now looking for a change of scenery. I have always had an affinity for tech stuff and am finally interested in making it a career. I have always wanted to create something and combine my love for computers in the process. With my extensive teamwork experience I would make an excellent fit into your company.

## Education

**GRAND CIRCUS CODING BOOTCAMP | JULY 2023 – JANUARY 2024**
- Library Terminal project: github.com/EricDopp/MidTermProject [N-tier architecture, git branching, pull requests]
  - Created a terminal to navigate a library's collection using C# in collaboration with two other coders
  - Program is capable of writing to and pulling from JSON files and integrates with a checkout system
- Roshambo project: github.com/EricDopp/GCLabs/tree/main/Lab10-Roshambo [split-case, class-based OOP]
  - Created a minigame to simulate rock, paper, scissors using C# and its split-case methods
- Diceroller project: github.com/EricDopp/GCLabs/tree/main/Lab3-DiceRoller [RNG, try-catch, if/else statements]
  - Created a program that allows the user to roll an N-sided die and their choice of number of dice
  - Integrated rules for craps with regards to the user choosing a pair of six-sided dice

**CLINICAL LABORATORY INTERNSHIP │ NOVEMBER 2020 – APRIL 2021**
**William Beaumont School of Medical Technology, Royal Oak, MI**
**BACHELOR OF SCIENCE │ BIOLOGICAL SCIENCES │ DECEMBER 2015**
**Oakland University, Rochester, MI**

## Technical Skills

- .NET
- SQL Server
- Git/GitHub
- HTML/CSS
- OOP
- TDD
- Bootstrap
- JavaScript & Typescript
- REST API

## Experience

**MEDICAL LABORATORY TECHNOLOGIST:  CHEMISTRY │ APRIL 2021 – PRESENT**
